

'Australia's leading software-independent technology specialists to the accounting industry'

Prepare for 2020 Tax Season

Get it done right, for FREE !

2020 Tax Software Installation & Year End

2020 Tax season is upon us, and we are ready to prepare your practice for the new financial year. Regardless of whether you choose **Handisoft**, **MYOB AE / AO**, **APS** or **CCH** as your practice tax preparation suite, there are prerequisite checks to satisfy, software modules to install, databases to upgrade, end of year reports to print, and rollover routines to run before you can prepare 2020 returns for your clients.

Flexible solutions for your Practice

DON'T PAY

~~\$1,500.00~~

~~\$900.00~~

~~or \$499.00~~

OUR SERVICE DIFFERENCE

Why pay more and get less? Our Tax update and rollover service offers you the following advantages compared to using an expensive & inflexible 'software vendor' offered installation service:

- Our service is **FREE** to all clients on our "Advantage" & "Evolution" service plans
- For clients who do not have a support plan with us, we are offering the Tax upgrade service for LESS than the software vendor's prices. In fact having your Tax Rollover performed by your software provider could cost you up to \$1,500. You could get yours **FREE** if you join a support plan with us!
- We offer flexibility of installation time slots ensuring minimum impact to your daily business activity. We offer a 'Zero Downtime' option. Whereas the software vendors are so overrun, you get little choice at all
- Other services can be server install only— i.e. the portion of Tax software updates that require PC installations must be completed by you! Our service is a turn-key solution for the whole practice!
- What if there is a problem? Avoid the long support queues with your software vendor at the busiest time of the year— our service allows you to call our congestion-free support lines—and we can manage the problem for you
- Software vendors have a 'strictly business-hours only' policy resulting in DOWNTIME for the practice during the Tax upgrade. WE'RE DIFFERENT... We can do it after-hours to minimise downtime!
- Avoid the long wait in support queues at the busiest time of the year—our service allows you to call us direct and we can manage the issue so that your staff don't have to!

PRE ROLLOVER CHECKLIST

(What we will do for you)

Today's accounting software is very modular and integrated. This means that one part of the system has co-dependencies with other parts. Failing to have the right prerequisite updates in one module can mean that you are **unable to install the latest Tax Software**

Does your system have sufficient resources?

Does your system have enough free Disk space, CPU & memory capacity to successfully operate the new software? **How would you know?**

Are prerequisite Microsoft Updates installed?

Microsoft updates - your accounting software vendor assumes that your system has been correctly maintained with patches and updates from Microsoft to ensure a **reliable platform**. **Is yours ready?**

How healthy is your existing Tax database?

Database consistency checks—Tax software installation & rollover routines can fail if the database has even small inconsistencies or errors. These can be easily identified and resolved—but it pays to do it **BEFORE software support queues blow out** and you are stuck with a **malfunctioning system**

SQL database engine up to date?

If your practice uses SQL Tax today, has the SQL engine been upgraded to SQL 2014 or better? **How would you know?**

Too technical? Why not let us manage this for you? Easy!

Smart . Business . Partner

Notes: 1) Prices exclude GST; 2) Clients without support may sign a support agreement and qualify for the pricing offered in the table above

This year Accountable Group are offering you a low-cost Tax software install, update, roll-over/forward & priority support service. This service will be provided over-the-wire and with an **after hours option** so as to ensure the fastest response, lowest cost, and least interruption to your practice. The process will be as follows:

Friday – 'Dial in' connect to your system and check all prerequisites are in place & download the appropriate updates to your system. Even if you have not received your Tax update yet, we will download it onto your system for you! Trigger special Tax back-up in addition to your normal back-up

Saturday – Connect to your system and verify the back-ups has been successful before applying the update software; apply any last minute software patches; install the new Tax product; start your Tax roll forward; monitor progress periodically

Sunday – Dial in again and verify the new database tables have been populated and that the software is now ready for the end of year routines; correct any anomalies; back-up Tax again; run the new software and confirm it is operational

Monday – Full support team on standby to immediately (no delays) deal with any support incidents related to Tax – thus giving you an advantage in being one of the first to be 100% ready for Tax 2020

Weekend / after-hours options: 26-28 JUNE 2020 OR 03-05 JULY 2020

Or for our weekday package please fax your preferred day and date to suit your requirements. The process is the same as above, but completed during business hours

Office 365

Allows you and your team to utilise a familiar product on the go, once again creating a mobile office. Get the most productivity out of your staff.
